X-RAY SHOULDER – AP AND AXILLARY VIEWS

Patient Id: 1143	**Study Date & Time:** 31/07/2026 19:34
Patient Name: TEST_RDK	**Referring Doctor:** Dr. Ankur
Age / Sex: 89/Male	**Report Submit:** 07/11/2026 10:41

Technique

AP and axillary radiographs of the [right/left] shoulder.

REPORT

Normal alignment of the glenohumeral and acromioclavicular joints.

Glenohumeral and acromioclavicular joint spaces are maintained.

Articular surfaces are smooth and congruent.

No acute fracture or dislocation is identified.

No abnormal periarticular soft tissue calcification.

Visualized soft tissues are unremarkable.

Impression

No significant radiographic abnormality of the [right/left] shoulder.

ADVICE

Clinical Correlation for further evaluation
